- Copy Speed: 10MB / second
- Device eraser function for wiping Memory Card data
- Small compact design
- 1 year warranty

Summary

Flash Memory Card Towers are available in 3, 7 or 11 slot configurations where users can make up to 11 copies at a time. Copying Memory Cards is easy on a Memory Card Tower Copier; simply insert your master Memory Card and load the blank Memory Cards, then press the OK button. As soon as a slot signals ready, you can remove the finished, copied Memory Card and insert another blank Memory Card.

Because Memory Card Tower copiers operate without a PC, they are extremely easy to use. Bit-level comparison ensures a successful copy every time. All current Memory Card formats are supported, and the Tower is backed by a one year warranty. These Memory Card Towers can also be used to erase content from Memory Cards, leaving you with a clean, blank Memory Card ready for new data.
