** Microtech Production Systems and Rimage Professional Solutions only.

Authorised Microtech VAR:

Microtech and CD Team have been working in Partnership for over 10 years with CD Team being the leading European distributor throughout this period for Microtech duplicators.

Summary:

The Microtech Xpress XL Duplicator system is designed for production environments where flexibility and maximum throughput are paramount. Dual Disc Printers may be configured as the same type for highest throughput or as different types for switching between inkjet and thermal discs. Twelve recorders operate independently for highest production speed regardless if all discs are the same or each disc is unique.

Each Microtech Xpress XL unit includes a 800-disc capacity robotic handler and integrated PC for maximum throughput in a networked environment. The Xpress XL is a modular solution, using the ImageMaker software, or creating your own application with the API. A typical installation has one or multiple Xpress XL units publishing from your network in unison.

Other features include:

Multiple job processing and unlimited job queuing, Concurrent mixed media support, Customisable API, Fast robotics, Removable spindles, Modular Design with Quick Swap Robotics, 100/1000 Base-T Ethernet, ImageMaker Software, Optional ImageAligner for adding text and barcodes to pre-printed discs, Integrated Windows PC.
